

# MEET FLOCKITY+

**Startup of the Year**

**The same Flockity goodness w/ a sprinkle of UGC**

## **Flockity+: Choose a creator, spread the message, and stop the scroll.**

When you need message shaping, you can choose the creator, give direction, and own the final content. Think "Cameo" for jobs, whether it's a welcome video for a finalist or a creator talking about why your product team is a place they'd actually want to work.

### **How it works**

Flockity+ includes a set amount of traffic driven to your jobs on a quarterly basis, and here's where the PLUS comes in: You can pick the creator and help script the message.

### **What to expect**

Our creators would never pretend to work with you, but they can tell their audience why they choose to promote you. Choose a creator, collaborate on a script, have them release on their channels, and you can release on yours because you own the video.

### **How to get started**

Ready to see amazing net new traffic and commission some content to amplify your message? Get in touch with our team, or ask your agency to book time for a quick demo.
