

# MEET LINKITY

Startup of the Year

## Turn your employees into influencers, effortlessly

### Linkity: The employee ambassador tool they'll actually use

Empower your employees to share your company jobs (in their area of expertise) without lifting a finger. You know all those times you wanted your employees to share your content? And they didn't? Because it was hard? Exactly. Linkity makes it simple by focusing on jobs.

### How it works

Linkity automates job sharing for your employees. They can put their Linkity on any social platform and jobs are refreshed automatically based on the employee's location and job. Let them share your culture in their posts, and drive to open jobs on their team with zero effort.

### What to expect

Choose up to 10 employee ambassadors. Set each ambassador up based on their location and job family using our quick-start wizard. Then share their unique link with them. All they have to do is copy that link into their bio and poof! jobs shared, automatically. New job seekers delivered to your career site and jobs by your own employees.

### How to get started

Ready to jumpstart or re-start your employee ambassador program and drive great traffic to your jobs? Get in touch with our team, or ask your agency to book time for a quick demo.
